

## ARCOPTIX VIS-NIR SPECTROMETER

The ARCOptix VIS-NIR spectrometer is a broadband spectroscopy solution covering both the visible (down to 350 nm) as well as the near-infrared (up to 2500 nm). This all-fibered unit integrates our ARCOptix FT-NIR spectrometer as well as a multichannel grating spectrometer to probe light in the visible range. The two individual spectra are then processed and merged automatically in our software to deliver a single measurement of the VIS-NIR spectrum.

Featuring a high resolution (better than 1.5 nm) over its entire measuring range, the ARCOptix VIS-NIR spectrometer is a highly convenient, compact and user friendly instrument for various applications. The unit includes a dedicated Y-branch fiber bundle optimized for each spectral range in order to maximize the signal measured by each built-in instrument.
